## Introduction

Regenagri Standard – Farms is an international certification scheme for regenerative agriculture owned by Regenagri CIC (hereinafter referred to in this document as “Regenagri”).

This document defines the requirements for application to the Regenagri certification scheme and for entering into a License Agreement with Regenagri.

The License Agreement establishes the rights and obligations associated with participation in the scheme and access to Regenagri systems, services and intellectual property.

Entry into a License Agreement does not constitute certification and does not grant the right to make certification claims.

The purpose of these requirements is to ensure that:

- All applicants are assessed in a consistent and transparent manner prior to entering the scheme;
- License agreement relationships are clearly established and legally valid;
- Roles and responsibilities between Regenagri and the organisation are defined and understood; and
- Access to Regenagri systems and services is granted only to authorised and Licensed organisations.

These requirements form the basis for participation in the Regenagri certification scheme and shall be fulfilled prior to initiating certification activities.

### **How to read and use this document**

All provisions using the verbal form “shall” are mandatory requirements for certification and continued certification under the Regenagri Farms certification scheme.

Provisions using “should” are recommendations intended to support effective implementation and performance against the Continuous Improvement (CI) framework.

Provisions using “may” indicate permission, and “can” indicate possibility or capability.
